

Micronutrients, have been found playing a major role in boosting the resistance to disease and environmental stress. Prawn and fish depend upon an exogenous dietary source of vitamin C.

Vitamin 'C' plays a vital role in maintaining the integrity of connective tissue, blood vessels, bone tissue and wound tissue. It is a vital co-factor in the biochemical reaction for the structural support tissue, collagen.

Deficiency of Vitamin C can lead to reduced resistance to stress & disease, erratic moulting frequency, skeletal deformities, poor growth and anorexia.

Composition: Formulated Stable Ascorbic Acid composite.

Benefits:

- ◆ Strengthens immunity increasing resistance to disease & stress.
- ◆ Helps in regulating molting & development of exoskeleton.
- ◆ Helps in detoxification of liver
- ◆ Improves Feed Conversion Ratio (FCR).
- ◆ Improves survival rate, Boosts growth.

Feeding recommendations:

Inclusion rate for Shrimp & fish feeds: 1 -3 gms per Kg of feed For best results top coat, apply before every feeding meal, shade dry and broadcast. Do not store mixed feed for long. Please consult your Nutritionist for specific dosage.

Presentation: 2 Kg jar
