

# **EXPRESS\***

High CEC Aquaculture Grade 'Fast Acting' Zeolite

*Nothing acts  
faster than  
Express\**

#### **Benefits:**

- Restores Pond bottom conditions
- Instantly adsorbs & nullifies effect of toxic gases like ammonia, nitrite, hydrogen sulfide etc
- Improves water quality.
- Rapidly escalates Dissolved Oxygen levels in water.

Ammonia & Sulphides released by decaying organic matter like unconsumed feed, dead prawns, molts, fecal matter etc cause anaerobic conditions at the pond bottom. Prawn, a bottom dwelling animal, is severely affected by lack of oxygen at the pond bottom. Not only does it affect its' health & growth, in some cases causes mortality.

**Express\*** Zeolite swiftly adsorbs toxic gases, raises Dissolved Oxygen levels & restores pond bottom vitality.

#### **Broadcasting recommendations:**

**Pond Preparation:** 50 Kg/ Hectare of water spread Area

**During Culture:** 15 - 20 Kg/ Hectare of water spread Area

For Best Results, broadcast every 15 days.

Dosage can change marginally depending on pond & water conditions & stocking density. Consult your aquaculture expert for exact dosage and directions.

#### **Presentation:**

Powder, 25 Kg Net packed in an attractive HDPE Sack
