

ProDense*

A little every day goes a long, long way

It gives them something

“extra”

Disease control in recent years has undergone a complete change with focus on infection prevention through better nutrition management. **ProDense*** is a scientifically blended probiotic formulation containing Gram positive Bacillus species bacteria along with direct acting enzymes

ProDense*

designed to act in 2 ways

Enzymes

The fish digestive system is rather simplistic. Fish & Shrimps are deficient in digestive enzymes as in nature they are detritus feeders and are rarely required to digest complex animal & plant based diets.

Direct acting enzymes in ProDense makes proteins, fats and starches available to the fish & shrimp in more simplified formats of amino acids, lipids and sugars respectively, thus easing nutrition uptake*

Probiotics

Powerful spore-forming bacteria in **ProDense*** acidify the gut of the fish & shrimp and prevent the growth of pathogens like clostridia, Streptococci, E.coli, Salmonella and Vibrio species, thereby **preventing occurrence of major diseases**

ProDense*

A little every day goes a long, long way

In totality, **ProDense*** makes certain that the G.I. tract flora is well balanced and the feed is properly digested and absorbed. **ProDense*** ensures that the fish & shrimp remain healthy and achieve good growth and lower FCR.

Benefits:

- ◆ Direct Acting Enzymes in **ProDense*** opens up locked nutritional values in feed.
- ◆ **ProDense*** increases nutrient availability & absorption of feed in fish & shrimps.
- ◆ Proper utilization of feed reduces wastage.
- ◆ **ProDense*** ensures rapid propagation and stabilization of favorable gut microflora
- ◆ **ProDense*** enhances immunity during crucial production milestones
- ◆ **ProDense*** reduces incidences of diseases
- ◆ **ProDense*** increases growth rate & reduces FCR.
- ◆ **ProDense*** shortens the grow out time.

Feeding recommendations:

Inclusion rate: 1 kg per ton of feed. In case of dough, mix directly. For pelleted feed, apply with suitable binder, shade dry & broadcast. Do not store mixed feed.

Please consult your Nutritionist or Veterinarian for specific dosage.

Presentation: Powder, 5 Kg Pouch
