

The Smart Farmer's Choice

Mycotoxins are mold metabolites, very harmful to animals. Mycotoxins enter the feed through mold infected ingredients. This mold infection may not be visible to the naked eye, but already many different mycotoxins have been released within the ingredient.

Mold inhibitors only controls the growth of molds but is ineffective against mycotoxins already released in the ingredient.

Tox-Nil* acts as a mycotoxin enterosorbent that tightly and selectively binds mycotoxins in the gastrointestinal tract of animals, decreasing their bioavailability and associated toxicities.

TOX-NIL*

Mycotoxin Binder of Choice.

Tox-Nil* is composed of a combined variety of different HSCAS that are galvanized by a special process to obtain a coordinated effect increasing the capacity and spectrum of the mycotoxin binder. **Tox-Nil*** adsorbs and retains 95% toxins, which are passed away through feces without causing damage to the animals

Benefits:

- ◆ Prevents mycotoxins from being absorbed in the poultry blood stream.
- ◆ Significant improvement in body weight,
- ◆ Reduction in F.C.R
- ◆ Decline in mortality rate.

Presentation: Powder, 25 Kgs BOPP laminated HDPE bag.

Feeding recommendations:

Will depend upon the severity of mycotoxin contamination in feed / ingredients and their moisture levels. Technicians can also decide dosage based on the history of mycotoxin toxicity in the farm.

For moisture level in feed up to 15% use **Tox-nil*** @ 1000 gm / Ton of feed

TOX-NIL* *With Acids*

Mycotoxin Binder of Choice.

Along with high adsorbance HSCAS, the acids in **Tox-Nil* with acids** are basically to prevent bacterial & fungal growth in stored feed. Organic Acid salts exhibit strong anti-mold properties. **Tox-Nil* with acids** consists of a blend of select potent organic acids which thwart mold germination & growth.

Tox-Nil* with acids also acts as a weak gut acidifier. Organic acids have also been used in order to eliminate bacteria in feed.

Benefits:

- ◆ Prevents fungal & bacterial growth in the feed.
- ◆ Lowers gut pH and improves gut environment.
- ◆ Inert and safe for animals & birds of all ages.
- ◆ Compatible with all feed additives, vitamins and minerals.

Presentation: Powder, 10 Kgs BOPP laminated HDPE bag.
